Art Unit: 3743

The office action mailed June 13, 2000 (Paper No. 11) is incorporated here by reference and a copy is physically incorporated into this action. No amendments at the time of filing the CPA have been made to the claims as they existed at the time of the June 13, 2000 office action. While an amendment after final (Paper No. 12) was denied entry (Paper No. 13) on grounds of new issues and new matter, applicant has not requested entry of that amendment. Accordingly, this office action, like its predecessor, Paper No. 11, is made final. See MPEP 706.07(b).

This is a CPA of applicant's earlier Application No. 08/998,507. It appears to have been filed by Mr. Sapone, who is not the attorney of record in this application. There has been no revocation of the original power of attorney. Changes in correspondence address cannot be executed by an attorney not of record. MPEP 405. Accordingly this rejection is being mailed to the original attorney of record, Mr. Schneider. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3743

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Applicant's response to Paper No. 9 has been received. The elected claims examined here are 33-36, <sup>38</sup>40 and 43. Claims 5, 6, 8 and 37, 39, 41 and 42 are non-elected at this time. Applicant is correct to state that upon allowance of a generic claim, if one is allowed, all properly dependent species claims will also be allowed.

Applicants' response received November 22, 1999 (Paper No. 8) has been carefully considered. Curiously, that response has no discussion of Nelson (USP 5,820,456) which was applied to the original claims as either 35 U.S.C. 102(b) or 103. It appears to be as applicable to claim 33 as it was the original claim 1. Similarly no discussion of GB 344914 has been presented.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33, 34, 35 and 36 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nelson.

Art Unit: 3743

Nelson appears to show all of the positively claimed features. If applicants are claiming both heating and cooling means (which doesn't appear to be the case) one of ordinary skill would have found it obvious to have added a cooling means to the supply system to cool the air during the summer. Nelson shows a heating means at 17.

Regarding claim 34, Nelson discloses that increases in <sup>the</sup> temperature within the booth over that outside (i.e. outside temperature) also affects the air pressure differential (see col. 3, lines 35-50). It is submitted that, in Nelson, the value of the excess pressure in the room is determined at least partly by outside temperature as described in col. 3, lines 35-50.

Claim 33 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by GB 344,914.

See page 1, line 105 - page 2, line 3 and page 2, lines 28-41.

Claims 34-36 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 344,914 in view of Crider.

GB '914 is explained above in pertinent part. To have changed the differential pressure between the indoor and outdoor pressures in the manner taught by Crider to adequately vent the building of GB '914 during both hot and cold weather would have been obvious.

Claims 40 and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3743

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.
